

The Developmental Learning Center (DLC)
Ms. Jaynes

The Developmental Learning Center is a classroom for students with special needs who need to learn functional academics, self-help / living skills and beginning vocational skills. We have a major focus on communication and social skills. Besides our classroom instruction, we have various jobs around the school building including cleaning cafeteria tables after breakfast, picking up recycling for the school, shredding and sometimes making deliveries. Our students have a PE class with regular education students with around two times as many regular ed students as the number of students in our class. Our students enjoy being included in as many activities as possible at Whiteaker and making friends with other Whiteaker students.
