

## 6<sup>th</sup> Grade Intensive Syllabi (LRC)

Welcome to Whiteaker. We will be working on increasing your math skills so that you can graduate from High School with a regular diploma. In this class we have three stations that you will rotate through each day. One station will be working on skills that you may struggle with from the past. One station will be on the computer, using a math program called Moby Max. You can log into Moby Max at home if you have the internet. I would suggest 10-15 minutes per day of math practice at home if you intend to increase your math skills at all. The last station will be working on the new skills that are covered in your core math class in preparation for the SBAC test in the spring.

The class is a pass, no pass class. This is a participation, attitude, cooperation, work completion grade. Points are earned each day with these things in mind. If you have enough points, you will pass this class.

On Friday's we will have half the class as free day. In order to earn free time, there can be no missing work. I will be checking to see if you have completed your homework from your regular math class. If you have it complete, you can have free time.

I am here from 11:30-3:30.
